

Appendix C Table 2 to Rule 901:10-2-14: Nitrogen rates^a for corn based on yield potential with no N credit.

Corn yield potential (bu/acre)	80	100	120	140	160	180+
#N/acre	80	110	140	160	190	220

^a N fertilizer rates are based on the following relationship:

$$N \text{ (lb/acre)} = -27 + (1.36 \times \text{yield potential}) - N \text{ credit or } 110 + [1.36 \times (\text{yield potential} - 100)] - N \text{ credit}$$
