

Appendix C Table 3 to Rule 901:10-2-14: Nitrogen rates for wheat based on yield potential

Yield Potential bu/acre	Nitrogen rate pounds N to apply/acre
50	40
70	75
90+	110

1. N rate is based on the relationship:
$$N \text{ (lb/acre)} = 40 + [1.75 \times (\text{yield potential} - 50)]$$
2. No nitrogen credits are made based on previous crop.
